

Option -BDF

Bradley® Drain Adapter Flange

Column Shower Adapter Flange allows for adapting new Column Shower to an existing Drain with 5-point mounting from Bradley®.

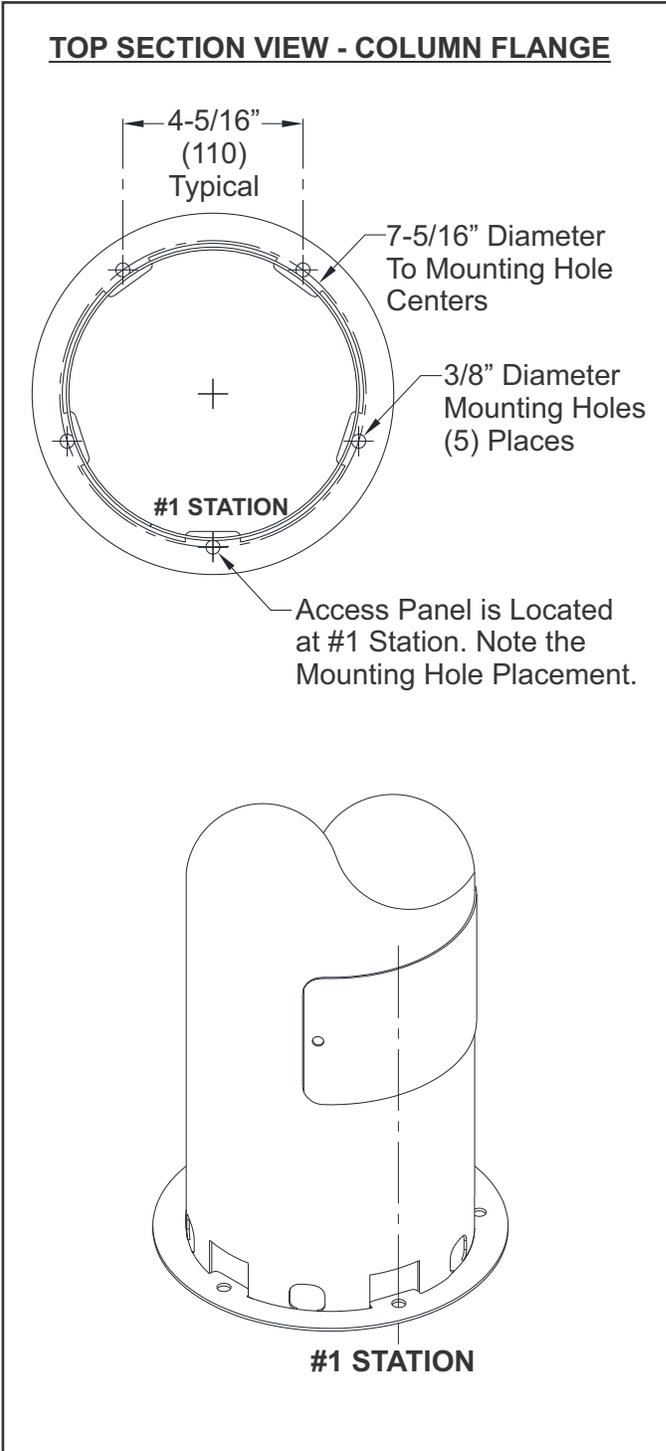

This option allows the replacement Column Shower by Acorn® to be mounted onto the existing Bradley® Drain Base and is optionally available with 700 and 600 series Column Showers in lieu of our standard (6-point) Mounting Flange.

The Column Shower will include specially located Mounting Holes on the bottom Flange which are intended to align with the existing Drain Base tappings (mounting hardware not provided).

NOTE: Mounting Hole dimensions must be verified by Customer to ensure proper fit (*Acorn Engineering Co.® assumes no responsibility*).

IMPORTANT: Customer should review existing orientation of Shower Heads and User Stations making note of the -BDF Flange Drilling as shown to ensure proper Shower alignment within room.

(NOTE: This option (formerly ENG-1080) replaces optional -BDA Bradley Drain Adapter Plate (P.N. 0909-001-001) previously offered.)
