

OPTION -BCD

Bottle Counter Display | Change Filter Alert

STANDARD FEATURES

- Displays a Replace Filter Notification Alert
- LCD Display Shows Refilled 16 oz Bottle Count
- LED Illuminates Bottle Fill Area (BF12 Models)
- Reset Button for Filter Replacement Alert
- Adjustable for Units With or Without Filters
- Offered with -SO Sensor Operated Bottle Fillers

SPECIFICATIONS

Optional -BCD (Bottle Counter Display) is offered for Bottle Filler models using -SO Sensor Operated Controls (Not available on Bottle Filler models with BAT Battery Power option). Provides LCD Display to indicate the quantity of 16 ounce Disposable Plastic Bottles Saved from a Land Fill and to notify Staff when (optional) Murdock[®] Manufacturing Water Filter replacement is required. Bottle Counter detects when the flow volume during a single use is less than 16 ounces and will accumulate volume used to advance Counter correctly. Includes a concealed, combination Filter and Operation Mode Button to Reset BCD following Filter replacement or set-up Mode for units without Filter to provide Bottle Counter display only. When specified with BF12, BF16 Series units, a LED Light is included which illuminates and brightens the Fill Area during activation. BCD requires an Electrical Power Source and includes a 9V Plug-In Transformer. Refer to individual Bottle Filler product submittals for availability.

(Input: 100-240VAC, 50-60Hz, Output: 9VDC, 0.8A).

BF12, BF16 Series

BF2S, BF4 Series
