Ligature Resistant Drinking Fountain With Bottle Filler

Ligature Resistant Stainless Steel Drinking Fountain with Bottle Filler is intended to be mounted on a finished wall and accessed from the front. The unit combines a patient friendly, Hands Free Drinking Bubbler and Bottle Filler in a safe, ligature resistant design. Unit delivers water at ambient temperature unless specified with optional Remote Water Chiller. Additionally, when mounted at the recommended height, the unit complies with ANSI, UFAS, and ADA requirements for accessibility. *(Compliance is always subject to the interpretation and requirements of the local code authority).*

Drinking Fountain features a Hands Free Sensor Operated control which is concealed and located beneath the Housing to ensure Bubbler does not activate from either passerby or during Bottle Filler usage. Fountain is constructed of 16 gauge type 304 stainless steel with exposed surfaces Powder Coated White. Integral D Shaped Basin includes ligature resistant Side Splashes and Grid Strainer Drain and is provided with a 1-1/2" O.D. P-Trap.

Bottle Filler features a Hands Free Sensor Operated control with 20 second maximum run time. Bottle Filler has a Laminar Flow Spout to minimize splashing and a 1.0 GPM (3.8 LPM) Flow Restrictor. Unit is constructed of 18 gauge type 304 stainless steel with exposed surfaces Powder Coated White. Housing includes sloped sides and top, with Ligature Resistant Grid Strainer Drain.

Bottom Enclosure conceals P-trap and Solenoid Valve Assemblies and is fabricated from 18 gauge, type 304 stainless steel, with white powder coating.

Solenoid Valve Assembly for both Infrared Sensors is provided with a 120VAC Plug-in Transformer and Battery Pack for when power is unavailable.

Standards: Unit is certified to ANSI A117.1, Public Law 111-380 (NO-LEAD), CHSC 116875 and NSF/ANSI 61, Section 9.

GUIDE SPECIFICATION

Provide and install Whitehall Manufacturing Model WHBF6 Ligature Resistant Stainless Steel Drinking Fountain with Bottle Filler. Unit to conform with ANSI, UFAS and ADA Accessibility Standards, when installed properly. Fountain to include an integral basin with a Ligature Resistant Grid Strainer, and Drinking Bubbler with a Concealed Infrared Sensor. Bottle Filler shall be provided with Sensor Operated Control with 20 second maximum run time. Sensor Solenoid Valve Assembly to include a 120VAC-9VAC Plug-In Transformer and a 9VAC Battery Pack. Provide Trap Enclosure to conceal P-Trap and Solenoid Valve Assembly. Drinking Fountain, Bottle Filler and Trap Enclosure to be constructed of heavy gauge type 304 stainless steel and powder coated white. Unit shall be certified to ANSI A117.1, Public Law 111-380 (NO-LEAD), CHSC 116875 and NSF/ANSI 61, Section 9.
