UNDERMOUNT Basin - Swirl & Concentric

PRODUCT Specification . . . Each basin is manufactured in one piece from 16-gage metal. The basins are available in 11-1/2" (292 mm) or 16" (406 mm) diameter sizes. The basin is designed for undermount applications. The basin has a 1" (25 mm) flat rim which is clamped between the countertop and provided S-clips. Four clips are provided for the 11-1/2" basin and six clips are provided for the 16" basin. Mounting hardware is provided by others. Textured finishes are applied in the inner surfaces. Swirl is a fine grain finish on stainless steel, where inner surface highlights create swirl patterns. The Concentric is a terraced pattern on the inner stainless steel surface. The underside of the basin is typically unfinished. A Satin Finish (-USF) or a Mira High Polish (-UHP) can be optionally applied to the underside of a stainless steel basin.

PLUMBING Specification . . . Each basin is designed exclusively for undermount applications. Undermounting S-clips are provided but anchoring hardware is by others. Basin shall have a 1-1/2" (38 mm) diameter drain opening for standard drain fitting. Drain, P-trap and faucet are not included. The basin can be manufactured with an optional overflow waste outlet.

All dimensions are subject to manufacturer's tolerance of plus or minus 1/2" nominal and subject to change without notice. assumes no responsibility for use of void or superseded data.
