Stainless Steel Surface-Mounted Remote Supply Box

Acorn Stainless Steel Surface-Mounted Remote Supply Boxes are used to supply water to flushing rim drains, can washing drains, shower heads, soap machines, hospital and similar equipment. Models with temperature gage are recommended where it is desired to know the temperature of the water being supplied; for example, soap machines and hospital equipment. Temperature gage has a stainless steel case and is calibrated from 0 to 200 degrees Fahrenheit.

Box is fabricated from 18 gage, type 304 stainless steel and all seams are continuous welded. It is furnished with four holes on the back for mounting. Wall anchoring hardware by others. Baffle is 22 gage. All exposed surfaces are polished to a satin finish. Door is provided with full length piano hinge, Cam Cylinder Lock with two keys.

Control Valves have cast bronze bodies and feature replaceable cartridges containing all wearing parts including the seat. Exposed valve parts are polished chrome-plated. Valves have a screwdriver Stop in each supply behind removable baffle, which permits servicing without shutting down the water supply. Maximum recommended working water pressure is 100 PSI. Maximum water temperature is 130 degrees F. Use this [LINK](#) for Flow Rate details.

Vacuum Breaker prevents contamination of the potable water supply. It is atmospheric type and conforms to the requirements of ASSE Standard 1011. Check local code authority for vacuum breaker requirements. Supply and outlet connections are 1/2" NPT and are securely anchored to the box so internal piping will not be damaged during installation.
