## HEALTHCARE HERO

## BASYC® SANITIZATION OVERRIDE FEATURE

You need to trust that your water is safe.  
With the BASyC® system, you can.

The sanitization override feature enables users to temporarily raise the water temperature up to 158° F, in order to instantly kill Legionella and other bacteria that could compromise users' health.

This maintenance task is essential for ensuring ultimate peace of mind.

Schedule this maintenance at an off-peak time for convenience and receive email alerts.

Additionally, the BASyC system provides:

- » Round-the-clock monitoring and adjustment capability
- » Regulation for up to 4 Valves and Multiple temperature loops with one Controller
- » Non-proprietary electronics which interface with any building management software system
- » Assurance of continual functioning even in the face of power or system failure
- » Set alarms and alerts to notify facility personnel if parameters fall outside what's allowed by the water management plan
