Option -CDT

Computer Desk Top -

Optional Computer Desk Top server is able to program and display data from each individual controller or Versa-Link. Valve data from each Versa-Link can be displayed simultaneously on the server allowing quick overview and programming of valves. The communication link wiring of the controller(s) to the computer is by others. Servers may be connected to an existing LAN and accessed by other computer clients on the same LAN using the Master-Trol client software.

The -CDT client option provides a desktop computer with client software pre-installed.
