

“With the AcornVac system, if a physician needs a different setup, the infrastructure is such that moving a sink from one side of the room to the other is probably an evening job.”

- Randal Brand, Director of Facilities and Support Services, The Polyclinic

SUCCESS IN SEATTLE

The Polyclinic, serving the greater Seattle area, wanted to open a clinic in a building that didn't have the plumbing infrastructure to accommodate their medical requirements.

With AcornVac, The Polyclinic was able to:

- Easily route water & waste piping to accommodate any clinic layout
- Provide a facility that can quickly adapt to changes in patient and physician needs
- Deliver a simple, low-cost and reliable plumbing solution

All with little to no disruption to the clinic's daily operations.

AcornVac delivers simple, low-cost and reliable plumbing solutions – a cure for all space planning & plumbing challenges.
