

MODEL NO. 4121ADA-008

# SCRUB SINK WITH EYE/FACE WASH

EXCEEDS  
**USP 800**  
REQUIREMENTS

The Stainless Steel Scrub Sink with Eye/Face Wash goes above and beyond to exceed requirements for USP 800, featuring our time-tested 16 gauge stainless steel construction, convenient sensor-activated faucet, front access panel designed for easy maintenance and an offset drain to minimize the spread of bacteria. For added safety, we've introduced a pull-down activated eye/face wash that flushes away contaminants, located inside the sink to prevent water on the floor.

## EYE/FACE WASH:

- Pull down activation
- Located inside the sink to prevent water on the floor
- Uses a single water supply line
- Equipped with two mixing valves, providing appropriate water temperatures for both hands and eyes

Optional faucet

Sensor activation

Includes offset drain to minimize bacteria

16 Gage Stainless Steel Construction
