

## BOTTLE FILLERS

### FEATURES & BENEFITS:

- 18 gage stainless steel.
- Convenient pushbutton or sensor activation.
- 1 gpm quick fill flow rate allows users to fill water bottles quickly.
- Key latch opens adjacent hinge door for simple filter replacement and maintenance.
- Laminar flow eliminates splash.
- Optional filter.
- Easy installation and maintenance.

### Bottle Filler - Pushbutton

The Pushbutton Semi-Recessed Bottle Filler is ADA compliant, vandal & ligature resistant and may be mounted in a 4" or larger wall space for simple installation virtually anywhere. The WHBF3 is fabricated from type 304 stainless steel and polished to a satin finish, housing a slim and trim look that blends perfectly to any environment.

### Bottle Filler - Sensor Activated

Model WHBF4 is a Semi-Recessed Sensor Activated Bottle Filler, structured from vandal & ligature resistant stainless steel, perfect for years of trouble-free service. It meets ADA forward and side reach requirements and features a key latch & hinged door for simple maintenance access. The WHBF4 can be mounted in a 4" or larger wall space for simple installation and blends to virtually any environment.
