

NON-FREEZE GROUND HYDRANT

BOX TYPE HYDRANT WITH DUCTILE IRON COVER

FUNCTION: Hydrant with hinged cover and box, for applications which require a flush with ground non-freeze hydrant. The closing valve is located below the frost line. When hydrant is shut off water is drained from the casing through the drain hole in the valve housing.

- NOTE:**
1. Addition of vacuum breaker will not allow draining of the casing, Not responsible for any casings that burst or related incidents if the hydrant is supplied with a vacuum breaker.
 2. All hydrants are manufactured with "NO-LEAD" brazing rings and USDA approved lubricants.
 3. The AB1953, California Lead Law, and NSF/ANSI Standard 61-2008 - Drinking Water System Components are not applicable to hydrants as they do not convey/dispense water for human consumption through drinking or cooking.
 4. Dimensions shown in parentheses are in millimeters.
 5. When installed in parking decks, garages or similar applications subjected to vehicle traffic, hydrant shall be located in a non-traffic location.
 6. FOR IRRIGATION PURPOSES ONLY.

REGULARLY FURNISHED:

Bronze Hydrant with Bronze Casing.
"T" Handle Key and Cast Iron Box
with Ductile Iron Cover with Lifting
Device.

VARIATIONS:

- 1" (25) Hose Connection Adaptor -HC1
- 1/8" (3) NPT Drain Hole in Box -N
- 1/8" (3) NPT Drain Hole in Valve Housing -NV
- "Water" Cast on Cover -W

OPTIONAL MATERIALS:

- Nickel Bronze Top -NB
- Polished Bronze Top -PB
- Rough Bronze Top -RB

TECHNICAL DATA

Non-Freeze Ground Hydrants are supplied with a special valve housing which prevents freezing of hydrant during non-use periods. The valve housing must be installed below the frost line which prevails for the area of installation. The valve housing has a drain hole which drains the casing during non-use periods. Since water from the drain hole is normally allowed to drain into the ground, the valve housing should be set in a bed of gravel. Water drained from the casing can then seep into the ground.

Some locations which require Non-Freeze Ground Hydrants cannot tolerate water draining from the drain hole. Examples are parking garages, plazas and roof decks used for recreational purposes. Often in these types of applications the valve housing will protrude into a finished area which is not subject to freezing temperatures. To eliminate the problem of water drainage in this type of installation, Murdock can supply a tapped drain hole in the hydrant box and a tapped drain hole in the valve housing. Through these tapped drain holes, water accumulation in the box and the water from the valve housing drain hole can be piped to a suitable drain.

**Hydrant Part List With
Maintenance Instructions**

NON-FREEZE
GROUND HYDRANT

● These parts are accessible from face of hydrant by removing face nut.

△ These replacement parts available in HPRK-41.

MAINTENANCE INSTRUCTIONS

1. Shut off water supply.
2. Remove face nut.
3. Pull stem out for complete access to all working parts.
4. Check all working parts for replacement.
5. Replace complete stem assembly and face nut.
