

OPTION -LSR

LEAF AND DEBRIS STRAINER
OUTDOOR DRINKING FOUNTAINS

STANDARD FEATURES

- Heavy Gauge Stainless Steel Construction
- Keeps Basin Free of Debris
- Improved Fixture Maintenance
- Greater Vandal Resistance
- Ideal for Heavily Treed Areas

SUGGESTED SPECIFICATIONS

Optional -LSR Leaf and Debris Strainer serves to cover Outdoor Drinking Fountain Bowl to lessen the accumulation of objects from gathering in Basin. Strainer fits snugly within Bowl limiting the free area for objects to accumulate while providing restricted openings for certain debris to enter Drain potentially clogging Waste Line. Strainer is made of 14 gauge (0.078) type 304 stainless steel with bead blast finish and includes 1/16" (1.5mm) wide slotted openings and vandal resistant stainless steel fastener for securing to Outdoor Drinking Fountain Bowl.

-LSR may be field retrofitted to existing Outdoor Drinking Fountain models (where offered as a standard option) using PN 7007-365-001.
