WATER CONTROL

Morris Group International's Water Control Divisions are focused on delivering water at the appropriate pressure and temperature for use in showers, sinks, appliances, and emergency safety equipment.

- Point-of-Use Non-Thermostatic Tankless Water Heaters
- Point-of-Use Thermostatic Tankless Water Heaters
- Point-of-Use Thermostatic Tankless Water Heaters with ASSE 1070 Mixing Valve
- Point-of-Use Mini Tank Water Heaters
- Single Phase Large Capacity Tankless Water Heaters
- Three Phase Large Capacity Tankless Water Heaters
- Electrical Accessories
- Flow Control

- Pressure Reducing Valves (PRV)
- Check Valves
- Master Mixing Valves (ASSE 1017)
- Emergency Tempering Valves (ASSE 1071)
- Lavatory Tempering Valves (ASSE 1070)
- Shower Mixing Valves (ASSE 1016)
- Thermostatic Balancing Valves (TMV)
- Supply Fixtures (TMV)
- Temperature Monitoring & Alarm (TMV)

- Eye Wash Stations
- Drench Hoses
- Safety Showers
- Combination Eye Wash/Shower Stations
- Accessories

PRVs are capable of handling a uniquely high level of water pressure, eliminating the need to install multiple PRVs in a line, thereby minimizing failure points and installation time.

MODEL NO.
Pressure Reducing Valves (PRV)

Discover how it works

CHRONOMITE® offers instantaneous tankless electric water heaters that provide an endless supply of hot water at the point of use. By heating water quickly and only when it is needed, Chronomite water heaters offer water and energy savings, resulting in lower maintenance and operational costs throughout a building.

DRAINAGE PRODUCTS AND SYSTEMS

Morris Group International's Drainage Products and Systems divisions, Jay R. Smith Mfg. Co. and AcornVac, concern the appropriate disposal of wastewater through drainage (Smith) and vacuum plumbing systems (AcornVac).

• Vacuum Plumbing Systems

- Water Closet Supports
- Smith Fluid Controls
- Lavatory and Sink Supports
- Roof Drains
- Floor Drains
- Sanitary Drains
- Cleanouts, Access Doors
- Water Hammer Arresters
- Hydrants
- Special Purpose Drains, Fittings
- Backwater Valves and Traps
- Interceptors - Steel, Stainless Steel
- Stainless Steel, Carbon Steel
- Smith Trench Drain Systems

SAVE
15-20 minutes
installation time
for each support.

Labor Savings Products

GET IT DONE FAST

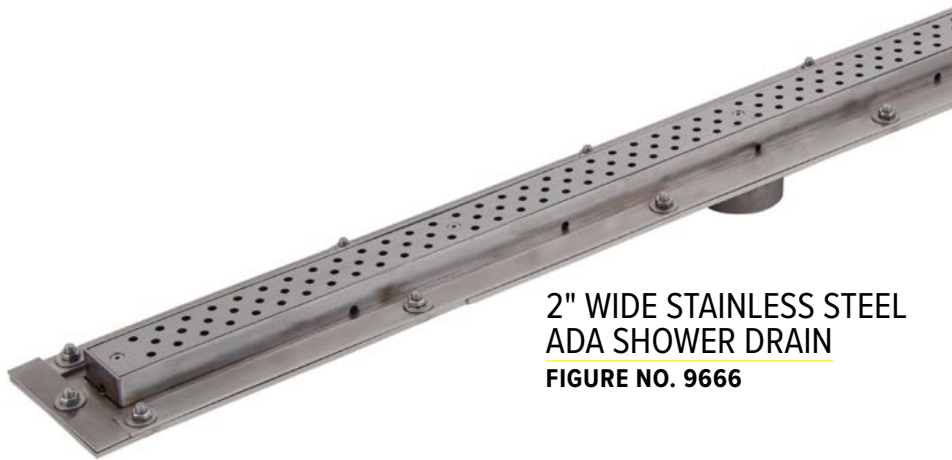

AcornVac® offers design freedom and future flexibility for all buildings with vacuum plumbing systems! AcornVac vacuum plumbing systems address many challenges associated with gravity plumbing systems, offering benefits in a variety of areas. These include eliminating floor cutting and the need to x-ray the slab to find a suitable place for waste piping, routing waste piping overhead and around obstacles, and eliminating the need for continuous slope on waste piping. In addition, vacuum plumbing can reduce labor and material costs and reduce water usage for toilets by up to 68%, leading to real savings in the cost of building construction and operating costs. AcornVac also contributes to flexibility in design by offering the ability to repurpose space and move plumbing fixtures quickly and easily.

Jay R. Smith Mfg. Co.® manufactures plumbing and drainage products used throughout commercial buildings. Our product line includes water closet supports, lavatory supports, floor drains, trench drains, roof drains, cleanouts, Smith Fluid Controls® trap primers and accessories, water hammer arresters, hydrants, and interceptors.

PRODUCT CATEGORIES

- Water Closet Supports
